

AIM (Traffic and Parking)

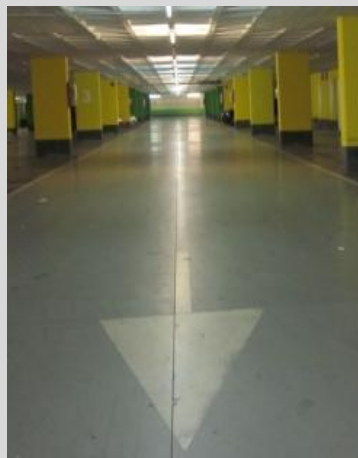

AIM has a long experience in writing traffic and parking studies, participating in the planning of infrastructure, their sizing and the preparation of financial economic studies for concessions. AIM offers support to concessionaires who manage infrastructure, engineering design and responsible government in the planning phase, adjusting to your needs, to guide infrastructure towards a scenario consistent with the territorial, social and economic needs.

dimensioning of the infrastructure

Informative study of the splitting of C-17
(AP-7 and C-33 junction)

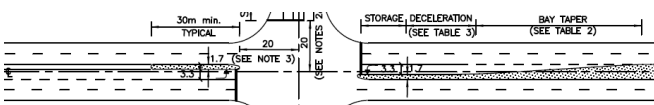

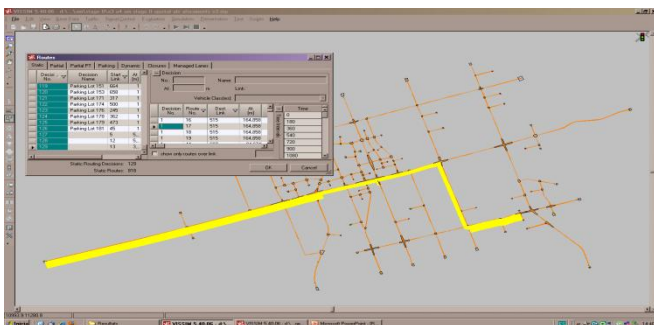

Economic and financial Study for Hospital Verge de la Cinta de Tortosa Parking
